New answers from the oldest name in microcomputer software.

We introduced our BASIC language for the very first personal computer. Today more than two million machines use Microsoft BASIC. It's the world's most widely installed computer language. The same care and attention we put into that product, we put into every product we sell today. The result?

Microsoft consistently delivers powerful, reliable, easy-to-use solutions for business, industry and education.

Solutions like MS™-DOS, the most popular operating system for 16-bit computers. Like Multiplan®, our flexible, plain-English electronic worksheet. Or Microsoft Word, the writing system that's revolutionized word processing.

Every Microsoft product is designed to be easy to learn and use, while taking full advantage of your computer's capabilities. Your new Microsoft program incorporates the most advanced concepts in software today, to give you peak performance and unlock the power of your machine.

FOUR IMPORTANT REASONS TO REGISTER YOUR PRODUCT NOW.

1.

Forget about proof of purchase.

■ Simplify your life. Register your Microsoft product right now. You'll elimi-
nate the need to provide proof of purchase when you wish to replace or
upgrade a product. Registered owners can also take advantage of other
Microsoft Customer Service options.

2.

The Microsoft Help Hotline gives you the help you need, whatever your application.

■ We want you to get the maximum performance out of your Microsoft
software. If you have any technical problem, we'll be glad to help.

■ However, most of the time you'll find the answer right in your product
documentation, so please take a look at that first. You might also give your
Microsoft dealer a call. If you're still puzzled, gather all the information pertinent
to the problem and call us at (206) 828-8089. This customer hotline will connect
you directly with your Product Support staff. They'll be ready to give you the
support you need to get the most from your Microsoft software.

3.

The Microsoft Product Replacement Plan.
If you need it, when you need it.

■ In spite of rigorous testing and the highest quality-control standards, even Microsoft products sometimes must be replaced. If your product is registered and proves defective, it will be replaced at no charge within the warranty period, and for a reduced price thereafter. However, you must either provide proof of purchase or have your product registered with us.

■ To return your product, first obtain a return authorization number from us. To do so, call us at (206) 828-8088. Please be ready to tell us your product registration number and the problems you are experiencing. Or, if you prefer, write us with full details at:

> Microsoft Corporation
> Return Authorizations
> Customer Service Department
> 10700 Northup Way
> Bellevue, Washington 98004

4.

Microsoft's ongoing Product Upgrade Plan
keeps your program up to date.

■ Your Microsoft software product uses the most advanced technology available today. But we continually improve our software, making it even more powerful. You can take advantage of our ongoing research—if you send in your registration card today!

■ As a registered Microsoft user, you'll pay just a fraction of the retail price for any improved versions of your program. And, when a new version is released, we'll drop you a note outlining the features we've added. We'll even enclose an order form.

■ Only registered owners receive these special update notices.

JUST REGISTER NOW!

■ Complete and return your registration now, before you use your new Microsoft product for the first time.

■ You'll receive all these benefits plus the satisfaction that comes from knowing your Microsoft product is guaranteed for quality.

MICROSOFT REGISTRATION CARD

`044014,110,114`

Please register your name and address immediately to secure your Microsoft registered user benefits. This will allow us to contact you should your product be updated.
